

Air Conditioning

Member Rebate

Effective 1/1/2024 through 12/31/24.

BENEFITS OF SWITCHING TO A/C

- 1. Temperature control with swamp coolers isn't nearly as accurate as it is with air conditioning systems.** If you have an evaporative cooling system, there is no reliable way to specify exactly how cool your home will be. All you can do is activate the swamp cooler when it gets too hot and turn it off when things cool down enough.
- 2. Swamp coolers require winterization to prevent system damage, taking them out of commission for months out of the year.** They also need to be winterized in order to prevent water transmission lines from bursting when below-freezing temperatures hit. Then, when the weather warms back up again, another trip to the roof is required to reactivate the evaporative cooler.
- 3. Air conditioning technology saves money over the long term.** Air conditioners use electricity to pressurize the refrigerant they need to cool the air. Swamp coolers use electricity to run the blower and water to cool the air. This makes AC systems much less costly to operate over the long term.
- 4. Compared with AC systems, swamp coolers are louder and less effective at filtering air.** Even though the swamp cooler might be installed on the roof, its operation can often be heard throughout the house. Modern AC units are often installed within close proximity to the home, but not directly attached to it. This results in quieter operation.

EMPOWER

Most products are eligible for Empower financing. Let us help you bundle upgrades and meet all of your energy goals in one package. Invest in your home, in your comfort, and begin generating energy savings from day one.

- On bill financing
- Low interest rates
- Loans starting at \$500
- Financing terms up to seven years
- No money down
- 0% interest for 12 months
- Up to 100% financing
- No fees

Visit siesa.com/empowerfinancing for more information.

Air Conditioning Member Rebate

Effective 1/1/2024 through 12/31/24.

AVAILABLE REBATES & PRODUCT SPECIFIC REQUIREMENTS:

- 1-ton minimum sizing and must be ENERGY STAR rated.
- No window or portable units.
- Seasonal Energy Efficiency Ratio (SEER) can be found on the yellow tag of your unit.

New Construction and AC Replacement Rebates:

- Evaporative coolers with a minimum 2,500 CFM \$200
- 13+ SEER Rating \$350
- 16+ SEER Rating \$450

Evaporative to Electric Conversion Rebate:

- Evaporative cooler conversion \$500
- Cannot be combined with above rebates.

REBATE REQUEST FORM

Please allow an additional 30 days for paper form processing. To fill out this form online, visit siea.com/rebates. Having trouble locating required info or have other questions? Call 800-279-SIEA (7432)

Please mail completed forms and documentation to:
San Isabel Electric
Attn: Energy Services,
781 E. Industrial Blvd.
Pueblo West, CO 81007.

REQUIREMENTS:

- San Isabel Electric MUST be your electric utility.
- Only ENERGY STAR appliances will be accepted.
- A receipt or paid invoice for the product must be attached.
- Members are only allowed 1 rebate per product type per year.
- All fields must be complete and accurate to qualify. For questions and more information, call 800-279-SIEA (7432).
- The completed rebate request form and documentation must be received within **90 days** of product purchase.
