

Outdoor Power Tools

Member Rebate

*New equipment only.

Effective 1/1/25 through 12/31/25

BENEFITS

Gas-powered outdoor power equipment emit gasoline combustion byproducts to the air. According to the U.S. Environmental Protection Agency, lawnmower exhaust contributes substantially to reduced air quality in metropolitan areas. Purchasing electric-powered equipment is a great way to reduce your environmental footprint.

THINGS TO CONSIDER

They are low maintenance. With electric models, you don't need to store gasoline, perform oil changes, treat fuel, change spark plugs or change filters.

You don't need to purchase gas, which can save you a little money every year. Not to mention the smell of gasoline that can get in your car from the gasoline can.

They start with a push of a button, no more pulling on a cord until you think your arm may fall off or worse throw out your back.

They are lightweight and easier to handle. Mowers and snow-blowers have foldable handles for easy storage.

You are reducing the environmental impact when you use electric (corded or battery) tools. Electric equipment reduces environmental impacts and energy consumption without sacrificing power. Because an increasing amount of electricity is produced from renewable sources like solar, wind, and hydropower, you can rest assured that these electric models are not just good for the task at hand, they're also good for the planet.

EMPOWER

All products are eligible for Empower financing. Let us help you bundle upgrades and meet all of your energy goals in one package. Invest in your home, in your comfort, and begin generating energy savings from day one.

- On bill financing
- Low interest rates
- Loans starting at \$500
- No money down
- Tax accommodations
- Up to 100% financing
- No fees

Visit sieweb.com/empowerfinancing for more information.
