

## Annual Member Preventative Maintenance Agreement for your Air Cooled Generator

Let San Isabel Electric take the worry out of servicing your stand-by generator. Preventative maintenance and service are known to maintain efficiency and increase life expectancy of mechanical equipment. Have the peace of mind knowing that we are keeping your equipment running safe and keeping your power on.

### Factory Certified Technicians Will Provide:

-  Fuel line & connection check
-  Check vibration, noise, leakage, & temperature
-  Check engine oil & replace filter when necessary
-  Replace air filter
-  Inspect enclosure louvers & clear if necessary
-  Replace spark plugs if necessary
-  Remove corrosion & test load battery
-  Lubricate engine
-  Test electrolyte level in unsealed battery
-  Perform voltage and frequency test under load & adjust

### Investment:

- 1st year: \$ 379**
- 2nd & 3rd year: \$ 349 per service = \$ 698 (Savings of \$ 60)**
- 4th & 5th year: \$ 329 per service = \$ 658 (Savings of \$ 100)**
- Total 5 year investment: \$ 1735**

\*Service agreement required for all financed projects.

\*If battery is required to be replaced an additional charge will apply.

\*San Isabel Electric strongly suggests customers perform a monthly check of the following items to ensure their generators are in good working order. Begin by looking for oil leaks or other signs of wear. It's also important to keep your generator clean by removing dirt and debris, and making sure no rodents, birds, or harmful insects have infiltrated the unit. Start the unit and confirm proper operation. If the unit does not seem to be operating properly or you have any questions, please give us a call.
